AEROFRAME SERVICES BREAKS GROUND FOR ADMINISTRATIVE BUILDING AT CHENNAULT

LAKE CHARLES, La. -- Aeroframe Services, LLC, broke ground today on an administrative building to house its growing operations at Chennault International Airport.

Aeroframe CEO Roger Porter and Chennault Executive Director Randy Robb led a tent ceremony and VIP groundbreaking at the construction site. Numerous local and regional officials took part.

Aeroframe will build a two-story, 18,000-square foot structure on vacant Chennault property near its existing operations. Construction will take about 12 months. The architectural firm is H. Curtis Vincent and Steven Shows and the general contractor is Alfred Palma. The building will become Aeroframe's global corporate headquarters.

The project is being funded by Chennault, the Calcasieu Parish Police Jury, the City of Lake Charles and the U.S. Commerce Department's Economic Development Administration.

"We're proud of what Aeroframe has accomplished in our community," said Lake Charles Mayor Randy Roach in his speech to the crowd. "We have some incredible employees in Southwest Louisiana, and their productivity is second to none."

In his remarks, Calcasieu Parish Police Jury President Kevin Guidry said, "When you put yourself on a global scale, that says a lot about Southwest Louisiana. That's the kind of economic development we want."

Aeroframe is the largest maintenance, repair and overhaul (MRO) facility in North America that specializes in Airbus airframe maintenance, operating in more than 530,000 square feet of hangar space and 8 wide-body bays.

Aeroframe is one of the major tenants at Chennault, a former air base which is now a nationally recognized center for aircraft maintenance.
